

Residential Pick-up Composting Services in the Philadelphia Archdiocesan Area

An internet search located the following private compost companies that offer residential curbside pick-up. Each company provides a 5-gallon bucket with a lid and picks up the filled bucket once a week or every other week. The subscriber is treated to a bag of finished compost in the spring. Many companies also provide commercial composting as well. This list was compiled at the end of 2023. Please check with the company for the most current information; EcoPhilly offer this as a helpful guide (we hope!), and we do not necessarily vouch for any specific firm.
